```
CWSB SCREENING MODEL - TEST REPORT

Model          : contender_B (ConvNeXt-Tiny, fine-tuned)
Thresholds     : no signs < 0.5   |   inconclusive   |   >= 0.9 WSB likely
Images tested  : 144  (114 real photos + 30 brightness-modified copies)

None of these photos were used to train the model.

--- RESULTS ON THE REAL PHOTOS ---

  Recall on infected     : 96.8%   (infested plants correctly flagged)
  Correct clears         : 90.0%   (healthy plants correctly cleared)
  Accuracy where decided : 96.1%
  Sent to retake         : 11 of 114
  Wrong                  : 4 of 114

--- BY DATA SPLIT ---
  test                91.7% correct   (72 decided)
  val                100.0% correct   (58 decided)

--- BY LIGHTING ---
  normal              96.1% correct   (103 decided)
  simulated-bright    85.7% correct   (14 decided)
  simulated-dark     100.0% correct   (13 decided)

--- BY CAMERA ---
  dsc-camera          90.6% correct   (64 decided)
  field-camera       100.0% correct   (62 decided)
  phone-timestamp    100.0% correct   (4 decided)

--- BY TRUE CLASS ---
  Healthy             90.0% correct   (20 decided)
  Unhealthy           96.4% correct   (110 decided)

--- THE 6 FAILURES (pages follow) ---
